# How would you describe this conference in three words?

# Brightcon could be improved by:

| More content for beginners | More interactive sessions | More breaks and downtime | More tutorials | Lightning talks | Online social sessions |
|:--:|:--:|:--:|:--:|:--:|:--:|
| 28 | 32 | 6 | 33 | 16 | 14 |

# Other ways Brightcon could be improved

Physical meeting

It was awesome! Nothing to add.

Earlier planning for agenda balance

GUI

possibility for breakout groups

Networking session. Fcoursed Breakout rooms, Crash courses

tech issues with blank screens.

Keep contents presented in the conference online

If 2nd editions is longer than 1st one, consider if split presentation on several days instead of all in one day?

30

# Other ways Brightcon could be improved

we may need to select presentations as other conferences do as I'd expect it to become bigger

The chat was a bit messy. Would be cool to have some chat rooms where people can share their thoughts on specific topics.

More time for discussions. Not just questions-answers.

sometimes it was irritating that there was a real discussion in the chat while there was a talk

Nothing to say

better documentation

It was very well balanced! (i.e. as a beginer, I didn't felt utterly lost)

More application examples

More breaks

# Other ways Brightcon could be improved

Preparing round tables around hot topics.

round tables

I appreciated a lot the round table on teaching brightway. As a bw2 user, I think that developers sessions were difficult to understand. Making different sessions, for different groups of researchers? e.g. for bw2 users/for developers/for teachers

Tutorial for the visualization or dynamic of Brightway2

notebooks?

perhaps a "year to year" follow up ? Something about community status (users, contributers, echnages, etc) ?

Consider a second edition of the Brightcon over 2 days so more people can present their work

Focused rooms based on needs. We were a group of persons in significant different levels of expertise and inclusion (Brightway up to AB)
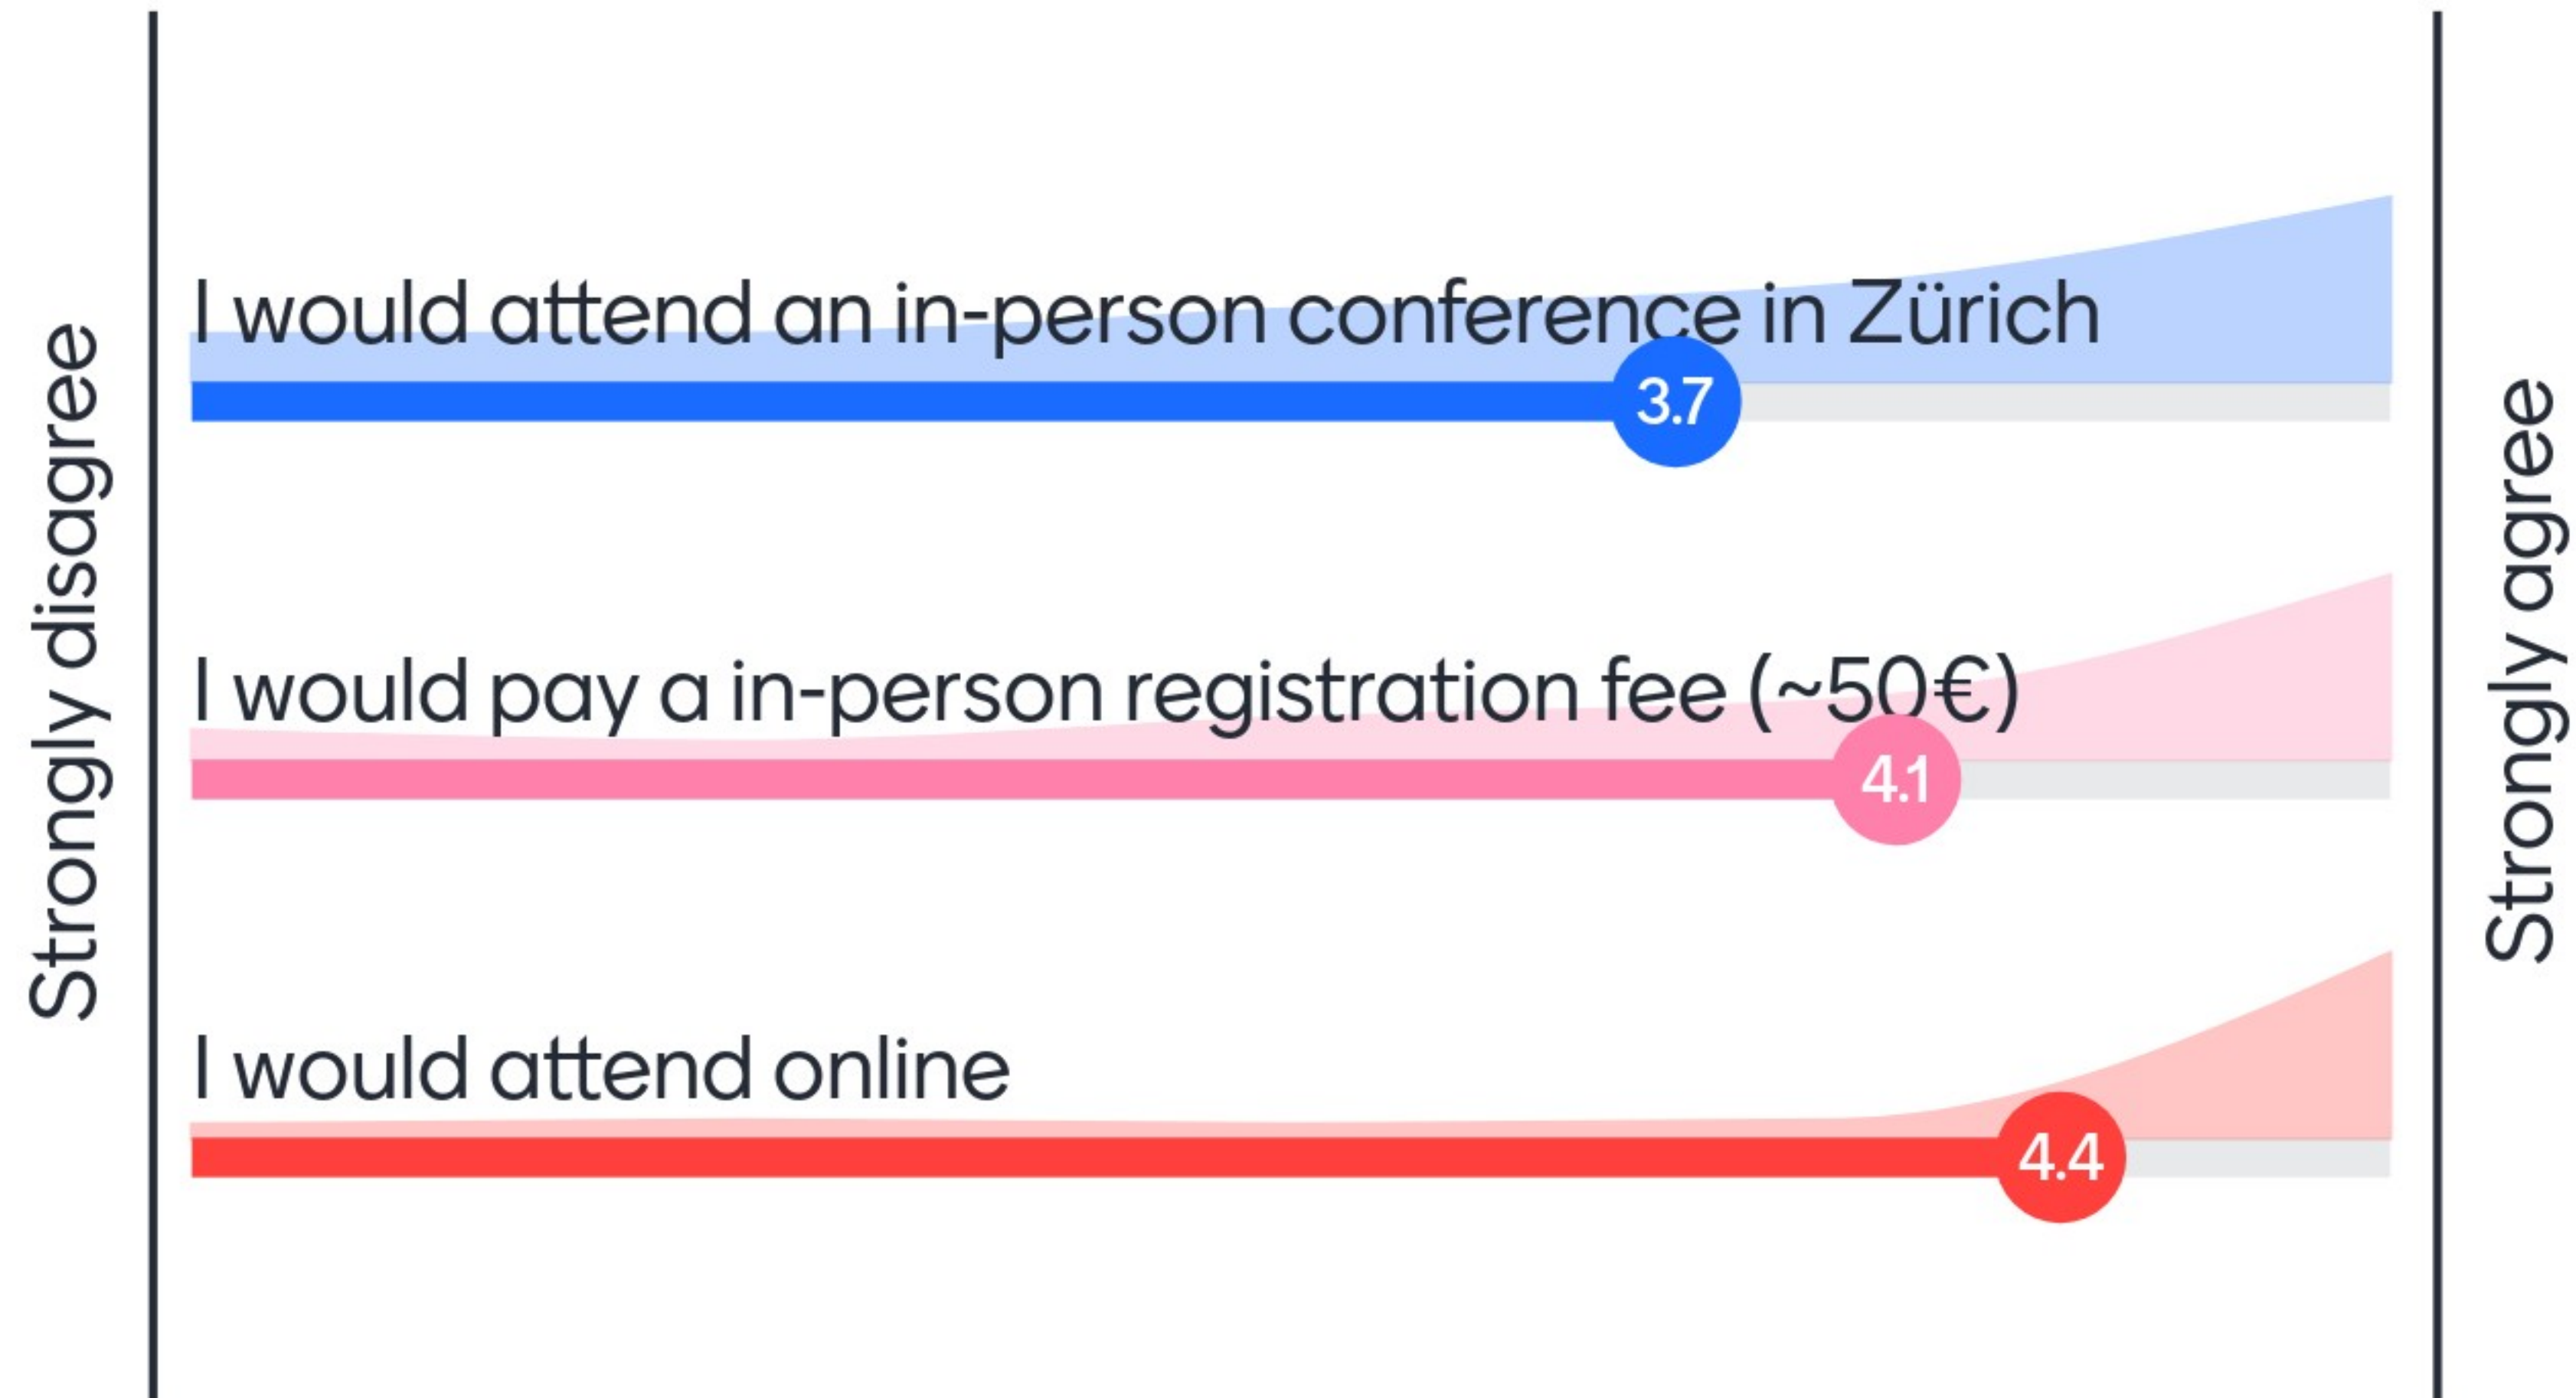

Workshops

30

# Other ways Brightcon could be improved

maybe GUI?

Perhaps have break-out rooms for developing new ideas (make it into a hackathon)

Maybe "Ask the expert sessions": many of us might have problems trying to implement concepts or tools presented today. It would be nice to have break out rooms where we can go to the expert and ask specific questions to solve our specific problems

30

# Brightcon Fall 2021

Strongly disagree — Strongly agree

I would attend an in-person conference in Zürich **3.7**

I would pay a in-person registration fee (~50€) **4.1**

I would attend online **4.4**
